Contents Volume 157, November 1, 1991

ALGEBRAIC LINEAR ALGEBRA

Special Editors: Robert M. Guralnick, William H. Gustafson, and Lawrence S. Levy

PREFACE 1

WILLIAM H. GUSTAFSON (Lubbock, Texas)
Modules and Matrices 3

RAYMOND HEITMANN (Austin, Texas) AND ROGER WIEGAND (Lincoln, Nebraska)
Direct Sums of Ideals 21

LAWRENCE S. LEVY (Madison, Wisconsin)
Direct-Sum Cancellation of Submodule Systems 37

WOJCIECH KUCHARZ (Honolulu, Hawaii)
Simultaneous Diagonalization of an Algebraic Family of Matrices 49

ROBERT M. GURALNICK (Los Angeles, California)
Similarity of Matrices Over Commutative Rings 55

DAVID CHILLAG (Haifa, Israel)
Nonnegative Matrices, Brauer Characters, Normal Subsets, and Powers of Representation Modules 69

DONALD G. JAMES (University Park, Pennsylvania)
Generators for Orthogonal Groups of Unimodular Lattices 101

BOSTWICK F. WYMAN (Columbus, Ohio), MICHAEL K. SAIN (Notre Dame, Indiana), GIUSEPPE CONTE (Genoa, Italy), AND ANNA MARIA PERDON (Padua, Italy)
Poles and Zeros of Matrices of Rational Functions 113

JAMES BREWER AND LEE KLINGLER (Boca Raton, Florida)
The Ring of Integer-Valued Polynomials of a Semi-local Principal-Ideal Domain 141

JAMES BREWER AND LEE KLINGLER (Boca Raton, Florida)
On the Pole-Shifting Problem for Non-commutative Rings 147

DENNIS R. ESTES (Los Angeles, California)
Factorization in Hereditary Orders 161

WILLIAM A. ADKINS (Baton Rouge, Louisiana)
Normal Matrices Over Hermitian Discrete Valuation Rings 165

Table of Contents continued

James T. Campbell (Memphis, Tennessee) and Elizabeth C. Trouy (Tuscon, Arizona)
When Are Two Elements of GL(2, $\mathbb{Z}$) Similar? 175

Surjeet Singh and Hassan Al-Zaid (Safat, Kuwait)
On a Canonical Form for Recurring Sequences 185

K. R. Fuller (Iowa City, Iowa), W. K. Nicholson (Calgary, Alberta, Canada), and J. F. Watters (Leicester, England)
Universally Reflexive Algebras 195

Carlos A. Berenstein and Daniele C. Struppa (Fairfax, Virginia)
Recent Improvements in the Complexity of the Effective *Nullstellensatz* 203

L. Le Bruyn and M. Van den Bergh (Wilrijk, Belgium)
Algebraic Properties of Linear Cellular Automata 217

Author Index 235
